

JOIN OUR TEAM

Rewild Education is a team of Wildlife Biologists who aim to bridge the gap between conservation science and society.

What we do?

We conduct immersive workshops in different ecosystems for people from all walks of life who are interested in learning about conservation and ecological science. We also try to communicate latest research in simple form with the help of images, videos, reels etc. on social media.

Skills required for Internship

- Working knowledge of MS Excel
- Social Media Content Creation
- Communication Skills for interacting with Ecologists and Forest Officers Online
- Background in Forestry/ Botany/ Zoology/Wildlife Art and Design
- Ability to read and understand scientific papers

Your Work as an Intern

As an Intern, you will be reading various scientific papers and explaining them with the help of images and videos. Check out our Instagram @rewild.ed for examples of science communications. You are open to use your own creativity.

You will also take part in interactions with Conservation scientists, Forest officers, NGOs and practitioners.

This is paid opportunity. Interested applicants are encouraged to send their CVs along with a sample of their own created content on conservation/ wildlife research.

Selected applicants will be called for an informal interview. **Last date to send CV and sample is 16th April.**
